

CHETHAN KUMAR G

Production Support Administrator | IT Production Operations | Infrastructure & Systems Administration
Bengaluru, India • +91 85480 39439 • chethanchetu797@gmail.com

PROFESSIONAL SUMMARY

Production support and infrastructure administrator with 5+ years of experience keeping enterprise production environments available, stable, and supportable. Day-to-day ownership of incident and service request resolution through ticketing systems, Windows Server and Active Directory administration, VMware ESXi and vCenter operations, enterprise storage and server hardware, and AWS and Azure cloud operations. Experienced in root-cause troubleshooting of live infrastructure issues, provisioning and access administration under least-privilege controls, and sustaining high availability across virtualization and data center platforms.

CORE COMPETENCIES

Production Operations: Incident Management, Service Request Management, Escalation Handling, Root-Cause Troubleshooting, High Availability Support, Zoho Ticketing

Windows & Directory Services: Windows Server 2016 / 2019 / 2022, Active Directory, DNS, DHCP, Group Policy

Virtualization: VMware ESXi, VMware vCenter, Gold Image Creation, Citrix Virtual Machines

Cloud Platforms: AWS (IAM, EC2, S3, VPC), Microsoft Azure

Networking: TCP/IP, VLAN, Routing, Subnets, Routing Tables, Security Groups

Storage & Hardware: IBM FS7200, Dell PowerStore, Dell Compellent, RAID Configuration, iDRAC, Server Provisioning

Access Administration: IAM Roles and Policies, Least-Privilege Access, User Account Provisioning

End-User & Application Support: Microsoft Office, Outlook, Microsoft Teams, Desktop and Laptop Support

PROFESSIONAL EXPERIENCE

Cloud Sys-Ops Engineer

IIHT Techademy, Bengaluru | Oct 2025 – Present

- Own resolution of cloud incidents and service requests end to end through the Zoho ticketing system, maintaining service continuity for users.
- Administer IAM roles and policies across AWS and Azure, enforcing least-privilege access standards.
- Provision and manage AWS and Azure user accounts with secure access controls and standardised permission models.
- Configure and support network components including VPCs, subnets, routing tables, and security groups.
- Deploy and manage EC2 compute instances, S3 buckets, and associated storage policies.
- Create VMware Gold Images and maintain cloud lab environments supporting training and delivery operations.

DC Operations – Infrastructure Services

IIHT Techademy, Bengaluru | Apr 2022 – Oct 2025

- Investigated and resolved infrastructure incidents across the data center, keeping virtualization platforms stable and available.
- Managed enterprise storage systems and server infrastructure to sustain high availability of services.
- Installed, configured, and maintained VMware ESXi hosts and vCenter environments supporting data center workloads.
- Administered Active Directory, DNS, and DHCP services, supporting authentication and name resolution across the environment.
- Configured RAID arrays, iDRAC out-of-band management, and physical server hardware during provisioning and maintenance.

System Engineer

IIHT Techademy, Bengaluru | Apr 2021 – Apr 2022

- Troubleshoot desktops, laptops, and Citrix cloud virtual machines, restoring service for end users.
- Supported Windows Server and VMware environments in day-to-day operations and routine administration.
- Installed and configured enterprise software including Microsoft Office, Outlook, and Microsoft Teams.

KEY PROJECTS

- **VMware Gold Image Management** — Created standardised enterprise VM templates for consistent, faster deployments.
- **Enterprise Infrastructure Administration** — Supported storage, servers, and virtualization platforms across the data center.

EDUCATION

Bachelor of Engineering, Computer Science — Sapthagiri College of Engineering, VTU (2021)

Diploma in Computer Science Engineering — Sri Krishna Polytechnic (2017)
